The “Roswell Incident” has assumed a central place in American folklore since the events of the 1940s in a remote area of New Mexico. In July 1994, the Office of the Secretary of the Air Force concluded an exhaustive search for records in response to a General Accounting Office (GAO) inquiry of an event popularly known as the “Roswell Incident.” The focus of the GAO probe...was to determine if the U.S. Air Force, or any other U.S. government agency, possessed information on the alleged crash and recovery of an extraterrestrial vehicle and its alien occupants near Roswell, N.M. in July 1947. Subsequent to the 1994 report, Air Force researchers discovered information that

provided a rational explanation for the alleged observations of alien bodies associated with the “Roswell Incident.” This report discusses the results of this further research and identifies the likely sources of the claims of “alien” bodies. (Summary by James McAndrew)

Vision Times reported on March 29, 2021, that Former Director of National Intelligence (DNI) John Ratcliffe revealed that the Pentagon would release a report on the government’s research on UFO sightings. Ratcliffe told Fox News that the report would detail more sightings “than have been made public.” “Some of those have been declassified. And when we talk about sightings, we are talking about objects that have been seen by Navy or Air Force pilots or have been picked up by satellite imagery that frankly engages in actions that are difficult to explain... Movements that are hard to replicate that we don’t have the technology for. Or traveling at speeds that exceed the sound barrier without a sonic boom,” Ratcliffe said in the interview. The story disclosed that in April 2020, the Pentagon released three videos that showed “unidentified aerial phenomena (UAP).” Two of the videos showed military personnel reacting with surprise and shock at how fast the unidentified flying objects were moving. Last August, the U.S. Department of Defense (DoD) announced the creation of the Unidentified Aerial Phenomena Task Force (UAPTF) to analyze and determine the origin and nature of the UAPs. Funding was tied to the pandemic relief bill and required that a report be delivered to the Congress within six months. That report is due June 1, 2021.
